This article has been retracted at the request of the authors.

Following the publication of the article, the authors contacted the editorial office to request withdrawal of the manuscript. Upon re-evaluation of the published data, the authors identified significant issues that undermine the reliability of the findings and conclusions presented in the study. In light of these concerns, the authors have concluded that retraction is the most appropriate course of action.

The Editor-in-Chief and the editorial board agree with this decision. We appreciate the authors' transparency and integrity in addressing the matter.

We apologize to our readers for any inconvenience this may have caused.

Date of retraction: 18 July 2025
